

WHY WE NEED SKIN CARE Acid Mantle Barrier & pH-Balanced Products

SKIN CARE PROCEDURES

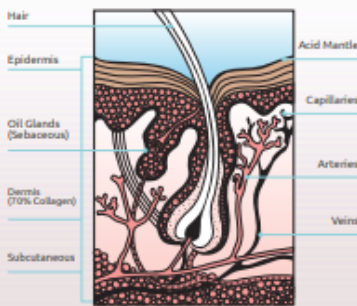

Nourish, balance, and protect your skin with our products (Yin/In). Cleanse toxins and impurities, and get your glow on (Yang/Out).

Skin is fortified by a shield called the acid mantle, which is only slightly acidic (with a pH between 5.5 and 6.5) and acts as a protective barrier.

Many companies use high-alkaline products of pH 8 and up, which strip the skin of this precious, protective acid mantle barrier. This leaves the skin prone to disorders, including wrinkles, dry skin, infections, and blemishes. In contrast, all Kandesz® skin care products are pH-balanced to reinforce and work harmoniously with the acid mantle. This helps keep your skin looking young, firm, and vibrant—for only when the skin is permitted to function at its best can it look truly beautiful.
